Attachments: R04 Equivio Request .zip1

Hi Kip,

The results have come back from Equivio. I've zipped them up and attached them in this email, although I'm worried it will bounce the attachment. It is slightly over 25mb. Let me know if that happens and I'll find another way to deliver it.

You will need to rename the .zip file from .zip1 to .zip – that's the only way to get it to send by email. Inside there are three folders: Mass mail comments, unique comments and unique comments with attachments. The PST file you sent had about 70 comments with attachments which Equivio couldn't view. We removed those from deduplication and ran everything else. The rest worked perfectly: you have about 250 unique email comments (separate from the ones with attachments) and the rest are all mass mails. The spreadsheet that is attached is automatically generated. It shows how many duplicates were received for each comment. You have about 10 mass mail campaigns but only one of any substantial size. The file names are also all in the spreadsheet, but the links won't work because it refers to where they were all saved locally by our software and by zipping them it can't keep the filepath. You can find all those files though in the folders based on the names.

Feel free to give me a call if you would like to talk about the results in the file, or if anything is confusing about what you are seeing in there.

Michael and Tim.

Attached is the request form. Given the size of the mailbox, I have requested that PST file be downloaded from the server by our IT folks. I will send the file when received. Thanks for your help today.

Subject: R4 public comments on draft NPDES permit

Hi Tim.

Thanks for briefly talking about potentially using the Docket team to help organize and compile public comments received for a draft NPDES permit. Below is the information I have regarding comments that are contained in an Outlook folder and paper files. Please let me know if this is something that your team can help with and how much time it takes to compile comments in a usable format.

Comments Received

- ~43,300 total comments received
 - o ~42,500 comments are form letters or form emails
 - ~26,400 are form letters attached to 6 emails
 - ~16,100 are form emails from various groups
 - o ~700 potential unique comments via unique emails
 - o ~40 of the ~43,300 are unique written comments received via mail, fax, or at hearing
 - o ~55 of the ~43,300 are unique oral comments received at public hearing within a transcript
- Notes about comments:
 - o Estimates are provided because I have not counted every comment yet
 - o ~16,800 contain individual emails with unique email addresses. It is assumed that these emails have the same content or comment; however, verification is required through manual or electronic means.

I appreciate your help.
